PRESERVE CULTURAL HERITAGE

- Worli Fort have been integrated with the design. - The entire area around the historical fort in a radius of 100 meters is preserved without any type of building.

ACTIVATE ECONOMY AND ATTRACT VISITORS

- Different types of businesses have been designed to be established in the area:

Bor and restaurants with views to bring Mumbai citizens to the area (Top floor). Fish market, to activate the economy of the local fishermon community (Countifloor level).

INTEGRATE GREEN & PUBLIC SPACES

- The public and green sloped roofs generate an interesting path to get through the building, attract visitors to the site and integrate green areas within the new construction.

ENSURE SOCIAL INTEGRATION

- The building is comprised of different types of apartments to allocate differ ent types of dwellers:

Typical Work - fisherman house (Groundfloor leve Small apartments (First floor). Medium size appriments (Center at the building). Big wilds it dges of the building

GENERATE OPEN SPACES

- 4/5 of the building is built on water, which provides big open areas for the

RELATION WITH WATER

-Building elevated 3m from the the sea level.

- Direct acces to the water and the piers throught different elevated platforms.

700.000 m² of free land in the heart of Mumbai seems to be atractive enough for some individual interests in order to leverage its inherent value to capitalize it, but it is our responsibility to put the local interests above the growing capitalism.

Mumbai is one of the world biggest and overpopulated cities in which the quick development of commercial and residential property zones is responsible Worll kallwada is one of the remaining assets that stirs to survive to the accelerated pace of a city in continuous development

The area is well-known for being a massive active traditional fishing harbour which underpins the economy of the local fishing community. The area also keeps the Worlf Fort, which preserve the roots of the first British settlers who snotched Mumbai from the Portugese.

The project aims to preserve the original fishing activity of the neighborhood, and preserve its local economy, but also adopt it to the surrounding and new-developed arras. Open spaces are generated and green and public spaces are integrated within the building.

Original World kaliwood settler will be accommodated in the new area, as weed as new dwellers, who will find their needs met in the new area, so the social integration scor come into belong in one of the cities with greater social inequalities.

But the main purpose is to preserve the Mumbal fisherman original settlers in one of their tradicional assets like is Kaliwada, preventing it from disappearing, like it has happened with many others, which were decimated by the hammer of commercialized development over the last few decades. Kaliwada is a four of culture, traditions and singular sprease that should remain the same.
