javier.gutierrez.sainz1993@gmail.com

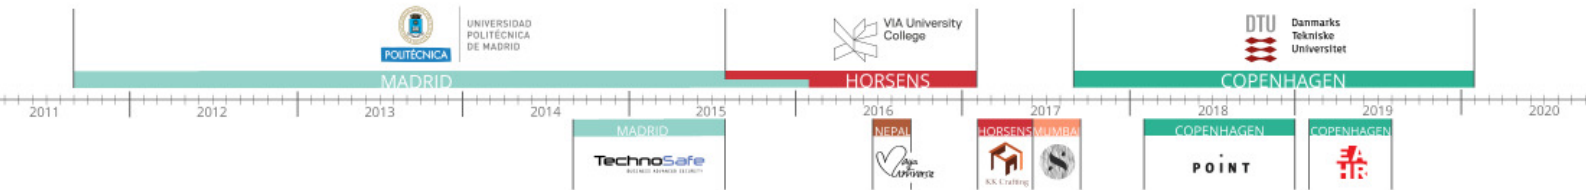

Nørre Allé 75
2100 København Ø (DK)

Enthusiastic urban planner master student with a solid background in architectural engineering and civil engineering. I consider to be myself to be a mixture between an architect and an engineering in continuous evolution.

I have had the opportunity to develop my studies in 3 different universities, in different countries, with 3 different perspectives of architecture and urbanism and 3 different teaching methods, which has given me a diverse skill-set and international flare. I have also gained wide professional experience which ranges from consultancy and architectural and design firms till humanitarian organizations.

I am responsible, creative and I am eager to take on new challenges and goals in my career. I can work very well under pressure to achieve a certain objective on a time and with excellence. I have developed strong interest in social architecture, sustainable architecture and urban design.

Sports fan, travel addicted, passionate about photography and willing to help others, I have done different volunteer programmes in different countries.

EDUCATION

• BSC IN ARCHITECTURAL ENGINEERING

Politechnic University of Madrid (Madrid, Spain)

Acquiring knowledge about building design and construction together with artistic and detail drawing and hand modelling. The mix between architecture and engineering students promotes collaboration and integration, preparing the students for the future working life. These fundamentals have laid the foundations of my future studies.

Sep 2011 - Jan 2016

• ARCHITECTURAL TECHNOLOGY & CONSTR. MANAGEMENT 6 Months Erasmus Exchange

VIA University College (Horsens, Denmark)

Exchange semester to carry out my bachelor project, a multi-story building in Horsens. I focused on building design and Danish building regulation, expanding my drawing skills with softwares such as REVIT, implemented with BIM and cost estimation with Sigma.

Aug 2015 - Jan 2016

• BSC IN CIVIL ENGINEERING - Energy Design & Urban Planning)

VIA University College (Horsens, Denmark)

Expanding my knowledge about how to make buildings more sustainable and how to reduce the energy consumption of the buildings, getting in touch with the passive house design concept. I specialised in urban design and sustainable urban development. I develop my bachelor thesis together with Vejle kommune designing a masterplan for the new urban development of Rosborg.

Feb 2016 - Feb 2017

• MSC IN CIVIL ENGINEERING - Urban Planning & Management

Danmarks Tekniske Universitet (Copenhagen, Denmark)

Specialized in Urban Planning and Management, focusing my career in sustainable communities, urban challenges, development of new urban areas, city design and mobility issues. "Integration of a temporary settlement into the urban fabric" the master thesis I am currently writing, taking the Shatila refugee camp in Beirut (Lebanon) as an example.

Sep 2017 - Currently

VOLUNTEER EXPERIENCE

- **SOLIDARITÉS JEUNESSES VIETNAM (SJV)**
Volunteer (Summer Camp for disadvantaged children)
Hanoi (Vietnam) - Jul - Aug 2014

- **VIA UNIVERSITY COLLEGE**

Horsens (Denmark) - Sep 2016 - Jun 2017

EXPERIENCE

• TECHNOSAFE BUSINESS & ADVANCED SECURITY

Junior Consultant

Responsible for the design and management of the projects, which were related to new shopping malls, hotels and financial entities, dealing with the authorities, the clients and the restrictive building regulation in relation to accessibility and building fire safety.

Sep 2014 - Aug 2015, Madrid (Spain)

• MAYA UNIVERSE ACADEMY

Volunteer Engineer

Assistance in the design and reconstruction of a school and its facilities affected by the earthquakes of 2015. Installation of photovoltaic panels to make it more sustainable and independent from the electrical network.

Jun - Jul 2016, Tanahun (Nepal)

• KK CRAFTING

Construction architect intern

Responsible for the design of the prefabricated concrete elements ordered by the clients and that will be built with 3D printing method.

Jan - Jun 2017, Horsens (Denmark)

• SURREAL DESIGN STUDIO

Junior Designer

Assist the design team with the retail and interior design projects for different brands and design of installations for different festivities. I participated in "Mumbai World of Christmas" project, which became the largest Christmas market in India in December 2017.

Jun - Aug 2017, Mumbai (India)

• POINT Aps

Construction architect intern

Working with refurbishment and new construction projects, competitions and urban design projects in Copenhagen area. Focusing on drawing plans, 3D modeling with virtual reality making and 3D printing.

Feb - Dec 2018, Copenhagen (DK)

• EMERGENCY ARCHITECTURE & HUMAN RIGHTS

Urban Planner assistant

Carrying out my master thesis with the project of integration of a temporary settlement into the urban fabric. Working in Shatila, a Palestinian refugee camp in Beirut (Lebanon), connecting it to the city and designing 2 elevated playgrounds for kids for the association Najdeh.

Feb 2019 - ongoing, Cph (DK)

OTHER METHODS

Hand drawing & sketching achieved thanks to years of study and practice.

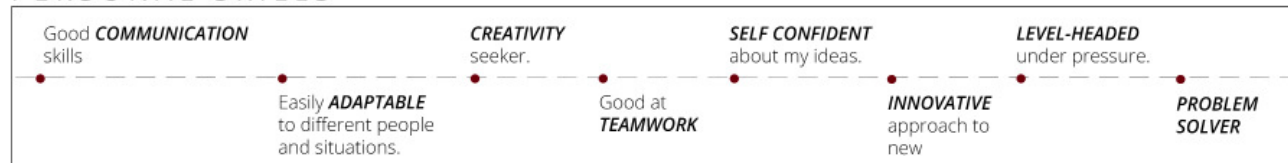

Model making.

Photography one of my passions since I was a child.

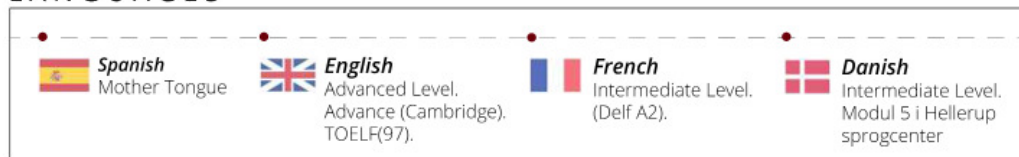

Currently I am enhancing my **3D printing** techniques.
